

Johan Fernando Garcia Casas

Integration Engineer · IBM MQ · IBM Integration Bus (IIB / ACE) · DataPower
Atlanta Metro, GA, USA · **Open to relocation** · (+1) 954-675-6464 · jfgc1394@gmail.com
linkedin.com/in/njogaca · github.com/njogaca · johangarcia.dev
Authorized to work in the U.S. — no sponsorship required

Professional Summary

Integration engineer with 8+ years building and operating enterprise middleware on IBM Integration Bus (IIB v9/v10) and IBM MQ for Tier-1 banking environments processing 500K+ daily transactions. Hands-on with ESQL message flows, DFDL/XML message models, IBM MQ queue manager administration, clustering and channel security, and service governance through IBM DataPower and WSRR. Delivered SOAP, REST and JMS services across distributed banking platforms, containerized IIB workloads on Docker and OpenShift, and built CI/CD pipelines in Azure DevOps, Jenkins and GitHub Actions. Currently completing AWS Solutions Architect – Associate.

Technical Skills

Integration & Middleware: IBM MQ, IBM Integration Bus (IIB v9/v10), IBM App Connect Enterprise (ACE), IBM DataPower, IBM WSRR, IBM API Connect

Messaging & Services: ESQL, MQSC, Message Flows, DFDL / XML Message Models, SOAP, REST, JMS, XSLT, JSON, MQ Clustering, Channels, SSL/TLS

Platforms & Tooling: Docker, OpenShift, Linux, Azure DevOps, Jenkins, GitHub Actions, Git, AWS

Languages & Data: Java, Python, COBOL, SQL, DB2

Experience

Operations Manager

Nov 2023 – Present

Belen de la Cruz Empanadas & Pastries · Atlanta, GA

Non-technical role held during U.S. relocation; technical skills maintained through independent projects (see Projects).

- Run end-to-end daily operations for 70–150 daily customers — staffing, scheduling, vendor relations and customer experience.
- Own P&L accountability: cash reconciliation, weekly sales reporting and cost control.

U.S. Relocation — Career Transition

Jan 2022 – Nov 2023

Independent · Atlanta, GA

- Relocated from Colombia to the United States and completed the U.S. work authorization process.
- Worked independently across construction, hospitality and food production while establishing residency, progressing into a full-time operations management role in Nov 2023.

Integration Developer

May 2021 – Jan 2022

PRAGMA S.A. · Colombia

- Designed, developed and tuned IBM Integration Bus (IIB v10) message flows in ESQL for high-volume banking transaction processing.
- Built and maintained message models (DFDL / XML) and mapping logic across SOAP, REST and JMS interfaces for core banking services.
- Containerized IIB integration nodes with Docker and deployed to OpenShift, standardizing dev, QA and production environments.
- Implemented CI/CD pipelines in Azure DevOps and GitHub Actions, reducing manual deployment effort and improving release reliability.
- Governed services through IBM DataPower and WSRR; validated behavior with unit and regression testing across SOAP, REST and JMS.
- Migrated IIB v10 flows toward IBM API Connect, running container deployments on Docker with Jenkins, Azure DevOps and OpenShift.

Expert Engineer 3

Nov 2019 – May 2021

SOPHOS SOLUTIONS S.A.S · Colombia

- Delivered and maintained IIB (v9/v10) integration solutions for multiple banking clients in parallel, including ESQL flow development, message modeling and production troubleshooting.
- Designed and administered IBM MQ queue managers, queue topologies, clusters and channels for reliable asynchronous communication across distributed banking systems.
- Exposed and consumed services over SOAP, REST, TCP/IP and JMS, ensuring interoperability across heterogeneous platforms.
- Administered IBM DataPower and WSRR, optimizing service lifecycle, policy enforcement and security gateway configuration.

Application Programmer

Feb 2017 – Nov 2019

IBM · Colombia

- Built IIB (v9/v10) integration services in ESQL for Tier-1 banking environments processing 500K+ daily transactions.
- Developed IBM MQ message flows, queues and channel configurations supporting high-availability, low-latency inter-system communication.
- Configured and governed services through IBM DataPower and WSRR, enforcing security policies and service contracts.
- Mentored junior developers and established integration patterns and coding standards adopted across the team.
- Led multidisciplinary teams designing and maintaining complex, enterprise-aligned integration architectures.

Software Analyst

Mar 2014 – Nov 2016

FASOFTCOL E.U. · Colombia

- Migrated AS/400 applications to COBOL batch processing and designed JCL scripts automating batch job scheduling.
- Built ETL pipelines loading flat files (CSV, TXT) into DB2 for reliable reporting workflows.

Projects

DFDL Parser & COBOL Copybook Mapper — johangarcia.dev

2025 – Present

- Built browser-based tools that parse DFDL schemas and COBOL copybooks (PIC clauses, COMP-3, field offsets), applying message-modeling knowledge from production IIB work.
- Shipped alongside a visual Docker Compose generator covering 50+ services; full product lifecycle owned end to end (requirements, deployment, custom domains, database and auth).
- Stack: Next.js, TypeScript, Tailwind, Supabase, Vercel.

SmartCameraIoT — IoT Smart Doorbell

2017 – 2018

- Built an IoT security and doorbell system on Raspberry Pi with real-time video streaming, motion detection and remote alerting.
- Implemented a Python/Flask REST backend serving an OpenCV video feed to a web interface.
- Stack: Python, OpenCV, Flask, Raspberry Pi, Linux.

Education & Certifications

B.Sc. Software Engineering

2011 – 2018

Universidad Central de Colombia · Bogotá, Colombia

AWS Certified Solutions Architect – Associate (SAA-C03)

In progress, 2026

AWS Technical Professional

Amazon Web Services, 2021
